JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

MEXICO.

Reports from Progreso—Yellow fever.

Acting Assistant Surgeon Harrison reports, August 18 and 25, as follows:

Period from August 4, inclusive, to August 18, 1906: On August 8 there was 1 fatal case of yellow fever in the lazaretto at Progreso. The history of the case has not been obtained. In Merida conditions remain unchanged. The Mexican medical officer here has begun the inspection of all passengers embarking from this port for all other ports. During the period covered by this report 10 steamships and 2 sailing vessels were dispatched, with crews of 481 persons, and passengers from this place, 87. Of these vessels 6 were fumigated.

Week ended August 24, 1906. In Progreso no quarantinable disease has been reported since the one case and death of yellow fever in lazaretto August 8. In Merida yellow fever has been continuous, with 1 or 2 new cases daily. During the week 6 steamers were dispatched, carrying passengers from this port, 29, and crews, 257; 1 vessel fumigated.

Report from Veracruz—Mosquito breeding places found in vicinity of locality in which yellow fever case occurred.

Acting Assistant Surgeon Frick reports, August 4, as follows:

In confirmation of my cablegram of this date stating that a case of yellow fever had been reported on the previous day, of which Veracruz was the focus, I have further to say that I found several mosquito breeding places in the vicinity of the house in which the case was found. These breeding places contain many larvæ of the *Culex tæniorhynchus* and *Tæniorhynchus fascialatus*, some *Stegomyia fasciata*, and other larvæ.

PANAMA.

Report from Bocas del Toro, fruit port—Sanitary conditions.

Acting Assistant Surgeon Osterhout reports as follows:

Week ended August 25, 1906. Present officially estimated population not obtainable; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage.
Aug. 18	Helen.....	New Orleans.....	21	0	0	0
22	Greenbrier.....	do.....	47	0	0	0
23	Fort Morgan.....	Mobile.....	23	0	0	0
